

Safecoat Focus #14 Naturals Clear Penetrating Oil

Safecoat Naturals Clear Penetrating Oil is an organic plant-based premium penetrating oil for new and old unfinished woods. Excellent on wood fencing, timberwork, furniture, decking, paneling and trim, it rejuvenates, weatherproofs and enhances the innate beauty of wood surfaces. Reduces peeling, blistering, cracking and improves dimensional stability.

"We treated the natural spruce wood with your AFM Safecoat "green" sealer. The main house, guest house/garages, gazebos, light standards and pool equipment enclosure were all treated with your product. We have used "non-green" products in previous years and were a bit concerned whether the product would stand up to the elements. We are very pleased with how the wood has responded, it seems less dry, and looks rich and even in color and finish. Our painters were also impressed with the AFM/Safecoat sealant and said they would be recommending it to other clients.

Gordon Wangers, CMO/Sierra Club Green Home

"I just wanted to relay that we LOVE the AFM Safecoat sealer and what it has done to improve the aesthetics of our home. Once again this proves the quality of your product and its many uses.

Jennifer Schwab, LEED AP/Sierra Club Green Home Director of Sustainability
